Dear Catalina

### **Paris Pledge**

I am delighted to confirm that the Ecology Building Society is not involved in the financing of coal mining or coal power. This covers all of our activities and services including lending.

In recognition of the grave threat to the world's climate posed by ongoing mining and use of coal, as well as the urgent need to transition towards a low/no carbon economy, we pledge that we will continue to avoid financing coal mining and coal power, and will support the financing of renewable energy and energy efficiency.

Ecology Building Society is dedicated to building a greener society by supporting ecological building and sustainable communities including lending on projects and properties that support the environment and providing simple, transparent and fair ethical saving accounts for our members. We are owned by our members and driven by our mission to build a sustainable, low carbon future by supporting and funding a combination of energy-saving technology and clean energy.

Yours sincerely
