CaixaBank – 2016-2018 Environmental Plan

COMBATTING CLIMATE CHANGE

CaixaBank’s Environmental Plan, which focuses its efforts on combatting climate change, has been defined with the aim of contributing to reaching the objectives set by CaixaBank’s Strategic Plan, which has as one of its main goals achieving leadership in quality, trust and reputation.

- Become a Carbon Neutral institution in reference to the calculated reach of our carbon footprint
- 100% procurement of green energy from renewable sources.
- Consider the risks and opportunities associated with climate change as part of our business strategy. Progress in extra-financial risk management by way of progressive development of sectoral policies and training in management of environmental risks when financing projects.*
- Promote the marketing of existing products and develop new products with a positive environmental component.
- Strengthen the inclusion of environmental criteria in the procurement of services and extension of environmental commitments in the value chain.
- Continue to lead on-line operations in order not only to improve our customer service, but also to reduce the environmental impact of our activity.
- Optimization of use of resources in offices with the introduction of digital signature projects and document imaging.
- Improve cooperation and synergies within the business sector in combatting climate change.*
- Continue setting goals to reduce emissions and inform the public in regard to them. Public information and transparency towards stakeholders.
- Extension of environmental commitments to all of the group’s subsidiaries.
- Continue to be part of the leading global sustainability indices that recognize our environmental management: CDLI, CPLI, DJSI, etc.

*Objectives with compliance date in 2020, subject to review in 2018
