

## ANTI-CORRUPTION POLICY

SEK opposes all forms of corrupt behavior. We support and comply with international initiatives to combat corruption and other financial crime. SEK complies with anti-corruption legislation in countries and jurisdictions in which we are active.

No form of extortion or bribery, including improper offers of payments to or from employees, organizations or public officials, is tolerated.

The use of “facilitating payments”, i.e. payments intended to speed up the handling of a matter, is prohibited. Any such act may lead to legal action as well as termination of employment, assignment or business relationship.

SEK does not accept any form of corrupt behavior in transactions that we finance. In the event of credible evidence of corrupt behavior, bribery or any other form of improper advantage in relation to a transaction, SEK will not take part in the transaction. (See also Policy on Sustainable Finance).
