

Corporate Climate Change Statement

State Street is committed to being a leader in environmental sustainability. We believe it is appropriate to recognize, evaluate and address the potential risks presented by climate change. These risks may relate to the operation of our business and affect our core constituencies: shareholders, customers, employees, and the communities in which we operate and live. We have clear goals to manage the effect of our operations on the environment, with particular regard to the risks of climate change. We regularly measure our progress against these goals. More broadly, and consistent with our commitment to leadership, we promote awareness of environmental and climate issues with our employees and other stakeholders. We also take an active part in the public dialogue on issues of environmental sustainability.
