

Environmental Management Policy

Commitments:

- Comply with environmental laws and other requirements.
- Protect natural resources and conserve energy by using environmentally friendly products.
- Procure recyclable products to promote resource recycling and prevent pollution.
- Participate in environmental public welfare activities and disclose environmental information.
- Actively procure green electricity, aiming for 100% green electricity use at domestic operation sites by 2050.
- Align with the goals and pathways of "Taiwan 2050 Net Zero Emissions" and strive towards net zero emissions.
- Continuously communicate and engage with stakeholders, indigenous people and local communities on environmental issues.

Management Policy:

- Comply with relevant laws and meet societal needs.
- Commit to pollution prevention and reduce environmental impact.
- Continuously improve systems to create sustainable environments.
