

Environmental Policy Statement

Introduction

Tyson Foods is committed to operating as a responsible leader in the food industry and dedicated to managing our environmental impact while delivering high-quality products to our customers. We serve as stewards of the animals, land and environment entrusted to us. As part of this commitment, we have established an Environmental Management System (EMS) in accordance with the principles outlined in ISO 14001.

Guiding Principles of Tyson's Environmental Management System

- Compliance: We are committed to complying with all applicable environmental laws, regulations and other requirements relevant to our operations. We will regularly review these requirements to ensure ongoing compliance.
- Pollution Prevention: We continuously work to identify and mitigate potential environmental risks associated with our operations. Our aim is to implement industry best practices, technologies and procedures to minimize waste generation, emissions, and resource consumption.
- Continuous Improvement: Through regular monitoring, evaluation, and review of our EMS, we strive for ongoing enhancement of our environmental management practices.
- Employee Engagement: We believe that our employees play a crucial role in achieving our environmental objectives. We provide training, resources, and opportunities for involvement to empower our workforce to implement and improve our environmental initiatives.
- Merger and Acquisition Due Diligence: We will assess potential acquisition sites for environmental compliance and conformance to Tyson Foods' Environmental Policy. If an acquisition is made, we will assess the acquired company's practices on waste, water, and energy management and integrate them into Tyson Foods' EMS.

Responsibilities

Tyson Foods' Environmental Services Department, in coordination with Tyson Food's Executive Leadership Team, is responsible for administering and monitoring this policy through implementation of the EMS.

This policy serves as a framework for guiding our actions and demonstrating our commitment to environmental stewardship.
