

Objectives 2009 for sustainable environmental policy

Environmental theme	Environmental objective	Objective 2009
Sustainable procurement	Integrate sustainability into procurement process	Aim for 20% of purchases being sustainable
	Sustainability declaration is a standard item in supplier management	Make available sustainability profile of supplier
	Add content to chain of responsibility	Visible result for the end user (take on responsibility for a minimum of one link prior and one link outside of own field of interest, this also to be requested of wholesale suppliers).
Sustainable transport	More sustainable transport policy	
Sustainable accommodation	Establish sustainability criteria	Basic agreements for design
	Energy saving and reducing light pollution	Night-time office, advertising and facade lighting switched off between 11pm and 5am.
Consume less and better	Cost saving by reducing non-recyclable waste and the recyclable portion of waste streams	Waste separation at source
	ISO 14001 certification in 2010	Preparation for ISO 14001 certification
	Conclude FSC agreement (<i>Covenant</i>) with FSC Netherlands for wood and paper	
	In particular during rebuilding work, install sensor taps and low-flow toilets	Water saving
	Expand house rules for sustainability	Computer off, cups in return container, separated waste disposal, lights out after work, double-sided printing and copying as standard
	Take part in the national CO ₂ benchmark	CO ₂ footprint of SNS REAAL
